It is desirable to avoid any idea at present of compelling them to work in First Aid Depots of A.R.P. in this circular. Naturally a good number will agree to do so. And in any case, they will be helpful in their homes, offices & their neighbours.

The draft as revised may be issued if the Minister for L.S.G. also agrees.

A.R.P. - FIRST AID TRAINING.

I have the honour to state that facilities now exist for training a large number of persons in first aid, through the courtsy of the St. John Ambulance Association.

N. Dis Rc. 1942/41-42

Forwarded

Certificates are undergoing training

There are now nearly 24 trained doctors in the city available for giving instructions. A.R.P. volunteers and members of the St. John Ambulance Brigade are undergoing a refresher course. I think that in an emergency a large number of first aiders would be needed and it is not safe to rely entirely on volunteer staff. It is therefore suggested that first aid training may be made compulsory for the members of the staffs of all Government offices and ~~other~~ institutions in the city, particularly school teachers, up to the age of 45. We would then be able to command the services of a body of workers who being paid officials could be relied upon to be of assistance in a real emergency. In any case this is a very useful training which it is desirable that as many members of the Government services including officers may undergo. The Heads of Departments may therefore be requested to direct the staffs under their

their control to undergo training in first aid.

Arrangements will be made by me to have them all trained at convenient centres and without interference with the normal work in the offices.
